CLAYTON CERTAINTY RAILWAY FOG SIGNAL DETONATOR

One hundred and fifty years of providing Safety for railway users.

The Clayton Certainty Railway Fog Signal provides a positive audible warning of hazards and emergency situations on the permanent way. The device can be instantly and simply attached to the rails by train crew or other authorized staff.

The device has been manufactured by the Clayton Penistone Group since 1895 with the basic design dating back to 1860. The design has remained largely unchanged during this time as it offers high standards of safety with total reliability.

Whilst the design has remained basically unchanged, we constantly monitor the quality to ensure it is never compromised and physically test a sample unit from each production batch every six months for the whole of its shelf life (5 Years from manufacture)

The current issue of our product safety data sheet is available on request or downloadable from web site at www.clayton-penistone.co.uk

- CONFORMS TO BRITISH RAIL SPECIFICATION BR 640 A
- PRODUCED UNDER STRINGENT QUALITY CONTROLS
- STRONG CONSTRUCTION FOR NORMAL SAFE HANDLING
- PROMINENTLY MARKED FOR IDENTIFICATION AND MANUFACTURE DATE
- PERCUSSION TRIGGER FOR UTMOST RELIABILITY
- SUPPLIED TO RAILWAY SYSTEMS WORLDWIDE
- UK BASED MANUFACTURING
- DANGEROUS GOODS CERTIFIED PACKAGING FOR TRANSPORT

Technical Information :

Product Identification: Clayton Certainty Fog Signal - Single – Lead Clip

Common Name : Railway Fog Signal Detonator

Proper Shipping Name : SIGNALS, RAILWAY TRACK, EXPLOSIVE

Use of product: Audible Railway Track Warning Device

UN NUMBER UN 0493 - The detonators are classified as 1.4G.

Net Explosive Quantity : 8 grammes per device
